SUMMARY

Python Full Stack Developer with expertise in Python, Django, REST APIs,Sql, Nosql and web application development. Skilled in full-stack and backend development with a proven ability to deliver scalable solutions in team environments. Proficient in object-oriented programming (OOP) and responsive design to meet diverse user needs.

COURSE

Besant Technologies

Bengaluru, Tamil Nadu

Full stack developer Master Program

Dec 2024 - Apr 2025

- Developed Python-based web applications with optimized database queries and caching, achieving improvement in data retrieval efficiency.
- Integrated front-end technologies (HTML, CSS, JavaScript, React) into team projects to enhance user experience, resulting a increase in engagement through improved design and responsiveness.
- Performed debugging and optimization of applications, achieving a increase in overall performance and scalability, ensuring applications could handle higher user loads and complex data processing requirements.
- Implemented AWS services and DevOps practices for deployment automation, CI/CD pipelines, and infrastructure management, improving system reliability and scalability

EDUCATION

Anna University

Melvisharam, Tamil Nadu

Master of Computer Application(MCA), cgpa: 8.4

Graduation Date: Sep 2024

Thiruvalluvar University

Vellore, Tamil Nadu

Bachelor of Computer Application(BCA), cgpa: 7.6

Graduation Date: Apr 2022

PROJECT EXPERIENCE

CAHCET

Melvisharam, Tamilnadu

E-commerce website

Mar 2024 - Sep 2024

- Developed a Django-based e-commerce platform, implementing features like product catalogs, shopping carts, and secure payment gateways, resulting in a streamlined and user-friendly shopping experience.
- Integrated front-end technologies (HTML, CSS, JavaScript) and responsive design with Bootstrap to create an engaging and mobile-friendly interface, enhancing user experience and increasing engagement.
- Optimized backend performance using Django's ORM, improving data retrieval speed and handling higher traffic with ease, resulting improvement in overall system efficiency.
